

AMENDMENTS TO THE SPECIFICATION

Please amend paragraph [0008], beginning at line 24 of page 5 as follows:

An object of the invention is to provide an automatic machine control device that can prevent an erroneous operation, remove an excessive loss due to the erroneous operation, and care for worker's safety by indicating that a brake is ready to be released, on an automatic machine main body having a brake to be released or in the vicinity of the automatic machine main body.
